Art Unit: 3641

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-9, drawn to a method of neutralizing opponents, classified in class 89, subclass 1.11.
 - II. Claims 10-19, drawn to a neutralizing system, classified in class 102, subclass 367.
2. The inventions are independent or distinct, each from the other because:
3. Inventions II and I are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product. See MPEP § 806.05(h). In the instant case, the neutralizing system could be used absent calculating the amount of CO₂ it will take to render the opponents unconscious.
4. Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art because of their recognized different search, classification, and divergent subject matter, restriction for examination purposes as indicated is proper.
5. Applicant is advised that the reply to this requirement to be complete **must include an election of the invention to be examined** even though the requirement be traversed (37 CFR 1.143).
6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Stephen M. Johnson whose telephone number is 571-272-6877
